Good to know:

## Clean Label

Our claim ensures more transparency and clarity in the declaration and inspires confidence.
$\checkmark$ only flavours of natural origin
$\checkmark$ no colours or preservatives
$\checkmark$ no flavour enhancers
$\checkmark$ no emulsifiers (except lecithin)
$\checkmark$ no hydrogenated fats
$\checkmark$ no modified starch
$\checkmark$ no raw materials from GMOs

More and more in demand: Lactose-free

Lactose-free products are becoming more and more popular. For customers who attach importance to this, we have suitable products in our programme. Ask us for lactose-free solutions.

Naturally also available:

## Organic products

The market for organic products is growing continuously. KESSKO offers you the right ingredients for your success in this segment: chocolate, nuts, flavours and mix products. The flexibility to expand your organic range as you wish.

Interested? Then contact us!

## For your safety

## Our certifications

Since partnerships require for durability and trust, we offer safe and reliable products with consistent product characteristics.

To ensure a consistently high level of quality, we have established a quality management system in accordance with the International Featured Standard (IFS) Food, which permeates all processes and levels of our activities and makes a decisive contribution to our success.

KESSKO offers you a range of organic products in accordance with the EU regulation and is inspected annually by the inspection body DE-OKO-013.

## Without it, all is nothing: Chocolate

As early as 1956, KESSKO started production of chocolate coatings, chocolate and cocoa masses, cocoa butter and cocoa powder.

As one of the few processors of raw cocoa in Germany we produce various cocoa masses for chocolate production. Chocolate couvertures "from the bean on" means the cocoa beans come directly from the country of origin to us in Bonn, where they are immediately processed in our roastery.

## Plain

Main application: Enrobing, canache, consumer plains, ice cream, chips (blockware only)

## For intense

## taste experiences: <br> Nougat

Making the best from nuts: from the raw mass to nougat cream to trendy nougat as a spread - completely without any foreign fat. Our spreadable nougat is so aromatic and nutty, that it also makes a great creamy spread. To achieve this unique taste, we roast our hazelnuts ourselves. In order to maximally activate the multifaceted aromas we attach great importance to an optimal temperature and plenty of time for a gentle roasting.

## In all forms:

## Nuts, almonds \& more

Nuts, almonds \& more are the perfect accompaniment for cakes, pies, breads or long-life pastries. No matter whether they are chopped, sliced, ground or processed whole, the oils bring the popular aromatic, nutty flavour into the baked goods. While our almonds convince with their aroma, our hazelnuts stand for a lively, strong taste experience. With the special roasting process in our own roastery, we unlock the full flavour potential of the nut.

## A fine finishing touch for more added value: Decorations

Our decorations not only look brilliant, they also bring the right "crunch" to your product. We produce our chocolate decorations from chocolate we produce ourselves, which we make especially for this purpose according to a special recipe. We also produce our brittle using a traditional process. From cooking to crusting, we have optimised our brittle process over many years and have created an ideal interplay between modern technology, raw materials and recipes. At the same time we can respond to individual customer wishes in the best possible way, since we can influence and control the process at all production stages.

## Sweet know-how since 1905

#### Abstract

When Gustav Kessler sen. founded the company in 1905, did he already suspect that even today generations of professionals trust in the quality of "his", the KESSKO products? On the one hand, this success story fills us with pride. On the other hand, it gives you the confidence in us that we strive to earn day after day.

As a successful company with a long tradition, we are a reliable partner for professional bakeries and confectioners. With our own product development department and our skilled application technicians, we design individual and flexible solutions - for the food industry as well as for the craft and chain bakeries, confectioneries, patisserie and wholesalers.

## 1905

Foundation of the company
Kessler \& Comp. Nutrient factories by Gustav Kessler sen. in Hilden

1914
The product portfolio consists of baking powder, marzipan, nut and nougat masses, fat glazes and cream stabilizers

## 1917

Relocation of the company to Bonn-Beuel, the present today's head office

Start of own logistics to the customers by professional KESSKO sales consultants

## 1930

Expansion of the company premises and production facilities

1942
The second family generation, Gustav Kessler jun.
joins the management

## 1970

The third generation strengthens the management around Gustav Kessler jun.: his two sons Wolfgang und Helmut Kessler

## 1998

Construction of the new administration building with a total area of $2,100 \mathrm{sqm}$, of which 700 sqm for research, development and quality assurance

## 2022

New tubular bag packaging
Packaging relaunch for chocolate, decorations, brittle \& co.

To mark the 100th anniversary of the company's centenary, the street sign Gustav-Kessler-Straße is inaugurated by the brothers Wolfgang and Helmut Kessler

## 1969

Doubling of the storage area and further investments in the automatic production facilities
1991
Expansion of the couverture and baking agent production

## 2016

The fourth generation actively joins the company. Mrs. Ulrike Kessler is elected chairman of the advisory board. She is one of the deceased Wolfgang Kessler's (1934-2014) three daughters

## 2019

Changeover of logistics to a central warehouse in Bonn
